Hydroponics Unit 4 Assignment

1)	Give a brief description of how your system works. Include where the water is held and how it flows.
	nows.
2)	What are some details of your system or the lab that you have learned through using it? (ex: Pumpkin roots grew too large and we needed a new container, propagation tray does better in the tent etc)

3)	Brainstorm some fundraiser ideas for future hydroponics classes. One idea is a plant sale. How would this work? Describe what we would need to do to make this successful.
